Allowable Subject Matter

1. Claims 1, 4, 9, 10-14, 16, 19, 30, 32, and 35 are allowed.
2. The following is an examiner's statement of reasons for allowance:

In regard to claims 1, 4, 14, 16, 19, 30, 32, and 35, the prior art does not disclose the combination of limitations of the claimed invention, specifically the limitations of:

a view angle correction function which is an operation of moving a zoom lens to prevent a change of a view angle due to moving a focus lens;

at least one of a shot function and limit function;

wherein the shot function is an operation of controlling the zoom from a current zoom setting to a preset zoom setting,

wherein the limit function is an operation of controlling zoom to restrict the zoom settings to a preset range,

wherein the preset range is less than a maximum range of the zoom settings, and the control part selects one of the controls to execute in accordance with a predetermined selection process, as claimed in claims 1, 4, 14, and 30.

In regard to claims 9 and 10, the prior art does not disclose the combination of limitations of the claimed invention, specifically the limitations of:

a view angle correction function which is an operation of moving a zoom lens to prevent a change of a view angle due to moving a focus lens;

wherein the control part obtains from the controller, a control signal for moving the zoom lens to a target position set by the controller according to the position signal

wherein the target position is set when executing a shot function wherein the shot function is an operation of controlling the zoom from a correct zoom setting to a preset zoom setting,

wherein the control part comprises a position signal fixing device which fixes, when executing the control based on the view angle correction function a value of the position signal to a value of the zoom lens before executing the control based on the view angle correction function, as claimed in claim 9.

In regard to claims 11, 12, and 13, the prior art does not disclose the combination of limitations of the claimed invention, specifically the limitations of:

a view angle correction function which is an operation of moving a zoom lens to prevent a change of a view angle due to moving a focus lens;

wherein the controller has a limit function for obtaining a position of the zoom lens and for restricting a moving range of the zoom lens so that the zoom lens does not move to an outside of a predetermined limit position,

and wherein the predetermined limit position is within a range of movement of the zoom lens that is less than a maximum range of movement of the zoom lens,

wherein the control part comprises:

a limit position determining device,

and a restricting device, as claimed in claims 11 and 12.
